

EDUCATION

MGM's Jawaharlal Nehru Engineering College (JNEC)

Jun 2023 – Jun 2027

B.Tech, Computer Science & Engineering | Minor in AI/ML | CGPA: 9.15

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Dart, C++

AI / ML: Machine Learning, Deep Learning (CNN), Generative AI, RAG, Agentic AI, Prompt Engineering, TensorFlow, Hugging Face, LLM Pipelines, Computer Vision, n8n

Full Stack: React.js, Node.js, Express.js, Flask, MongoDB, Firebase, REST APIs, Git, GitHub, Docker, GCP

EXPERIENCE

AI & Data Science Intern – Vishwakarma University

Jun 2026 – Jul 2026

- Built and deployed custom deep neural network models on real-world datasets; handled data preprocessing, training, and evaluation pipelines.

Upcoming AI/ML Intern – Infosys Springboard

Aug 2026

- Selected for Infosys Springboard's internship in Artificial Intelligence & Machine Learning; commences August 2026.

Technical Team Member, Google Developers Group (GDG)

Dec 2024 – Sept 2025

- Facilitated Gen AI Study Jam for **100+ participants**; completed MLOps workshop at GCP Bootcamp by Google experts at MIT-WPU.

PROJECTS

Moltress – Local Enterprise AI Assistant

2026 – Present

- Built an **Electron** desktop app integrating **RAG**, **ChromaDB**, and a fine-tuned LLM for context-aware assistance over enterprise code-bases and documentation.
- Implemented **Neo4j Knowledge Graph** for structured retrieval and engineered a **hallucination detection** pipeline ensuring fully privacy-preserving, offline-first inference.

Fire Detection – Deep Learning Based Fire Detection

Jun 2026 – Jul 2026

[GitHub](#) | [Live Demo](#)

- Designed and trained a **custom 18-layer CNN** (TensorFlow/Keras) on **42,000+ images** achieving **94% accuracy**; built full inference pipeline independently.
- Developed and deployed complete full-stack app with **image upload** and **real-time live camera** fire detection using React and Node/Express.

FoodBridge – Surplus Food Redistribution Platform

Feb 2026 – May 2026

[GitHub](#) | [Live Demo](#)

- Engineered complete stack – React, Node/Express, MongoDB, auth, and deployment – for a donor-recipient food redistribution platform.
- Integrated **AI image quality detection**, **real-time chat**, and **live map-based order tracking** end-to-end.

AarogyaMitra – AI Healthcare Platform

Dec 2025 – Present

[GitHub](#) | [Live Demo](#)

- Built WhatsApp integration and **n8n automation workflows** with webhooks cutting overhead by **50%**; engineered **Claude API** prompt pipelines for symptom triage.
- Developed patient-facing frontend; selected among top teams nationwide at **Anveshan National Round**.

Tarang: Ocean Hazard Response

Sept – Dec 2025

[GitHub](#) | [Live Demo](#)

- As **Team Lead**, developed AI/ML model for fake report detection at **90%+ accuracy** and coordinated full technical execution at Smart India Hackathon.
- Engineered hazard hotspot mapping system; deployed on Firebase with real-time sync; awarded **Top 5 in India** at SIH National Finals.

ACHIEVEMENTS

- Smart India Hackathon (2025)** – National Finalist & **Team Lead, Top 5 India**; only team selected from institution [\[Certificate\]](#)
- Anveshan National Research Competition (2025)** – Team CureX selected among top teams nationwide (AIU) [\[Certificate\]](#)
- AI Empo(h)wer – Infosys Springboard (Ongoing)** – Exclusive women-only advanced AI/ML programme; coursework in **RAG, Agentic AI**; completed **capstone project** [\[Live Demo\]](#)
- Google Cloud Arcade Champion (2024)** – **75+ skill badges** across Cloud, AI/ML, and Generative AI [\[Profile\]](#)
- Infosys Pragati, Cohort 7 (2026)** – Completed **40+ AI/ML courses** on Infosys Springboard [\[Certificates\]](#)
